PROFESSOR A. V. WILLIAMS JACKSON MY FRIEND AND TEACHER

To make future editions of the bibliography more nearly complete and accurate, all persons observing errors or omissions are requested to communicate them to the editor of this series, A. V. Williams Jackson, Columbia University, New York, who will gratefully acknowledge all such assistance.

PREFACE

It has long been desirable that students of Sanskrit literature should have as complete a catalogue as possible of all Hindu authors and their writings, in order that they might be able to tell at a glance how many manuscripts of each work are known, how many editions and translations have been made, and what has been written concerning them. It is the purpose of the present volume to fill this need for the Sanskrit drama. The material here presented has been collected for several years, but unforeseen circumstances have delayed the publication long beyond the time originally proposed, although some portions of the work have already appeared in print.¹

In a book of this character it is practically impossible to secure absolute completeness, and this is especially true of lists of manuscripts, since new catalogues of collections both in India and in Europe are constantly being published.² Many titles of earlier editions and of the older ancillary literature, moreover, were accessible to me only in catalogues of various descriptions, frequently compiled with scant regard to bibliographical accuracy and by no means complete. The conditions under which I labored precluded the possibility of access to all the actual manuscripts and editions, and I was therefore obliged to cite a large number of entries at second or even at third hand. Absolute fidelity to the original titles has consequently been denied me, and — a far more serious matter — it has only too often proved impossible for me to secure the pagination and other details of very practical import for Sanskritists. Even when the volumes were at hand, however, I did

not think it necessary to reproduce all the padding with which native scholars adorn their title-pages, so that a long entry has frequently been abridged in the following pages to the simple phrase 'edited with notes by . . . '

The arrangement of names and titles follows the order of the English alphabet, and no separate positions have been assigned to the vowels and consonants distinguished by diacritical marks. Heavy-faced type is used for the names of playwrights, ordinary Roman type for the names of plays. Plays are inserted under the author's name, when it is known, and cross-references are given under the titles of his various works. Anonymous plays are listed under the names by which they are known. Some titles, although identical with those of works by known authors, have had to be recorded in like manner as anonymous, merely because the necessary data for a determination of their authorship were not available. For the same reason no exact statement as to the number of extant dramas can be made at the present time.

Such honorific designations as 'Sri,' 'Kavi,' 'Bhatta,' 'Paṇḍita,' and 'Rāja' have usually been omitted, unless they form a part of the name as commonly known or are necessary to avoid confusion with some other playwright of the same appellative. Editions and translations are arranged as far as possible in chronological order, critical works are classified alphabetically by authors. Volumes containing both text and translation are listed under. text editions, and critical essays and notes are not separately recorded under critical works when included in editions of the text or in translations. Criticism relating entirely to a single author or play is catalogued under that author or play, but general books and papers are separately listed before the main body of the bibliography. A reference such as "Amrtodaya, A 1 p. 29 indicates that Aufrecht in his Catalogus Catalogorum has listed on that page one manuscript of a play called Amrtodaya. When more than one manuscript is referred to, the num ber is given. In the case of commentaries the number of manuscripts is also stated. Thus 'Com. 5, by Jagaddhara 2' indicates that there are five manuscripts of unspecified or anonymous

PREFACE ix

commentaries and two manuscripts of a commentary by Jagaddhara. In this way each entry shows the number of extant manuscripts of the work and of the various commentaries on it, if such exist. Some entries from Part 7 of the India Office Catalogue, however, duplicate those already given by Aufrecht from the Catalogue of the Mackenzie Collection; these were added because the early catalogue of Wilson gives no adequate description of the manuscripts, and because it seemed desirable to include all material not given by Aufrecht. The same is true of the Catalogue of Two Collections in the India Office Library, by Tawney and Thomas, which includes manuscripts recorded by Aufrecht from an old list by Sir William Jones. An introductory sketch of the Sanskrit drama has been incorporated in the volume, in order that students may have a convenient epitome of the whole subject readily accessible to them.

For the manuscripts listed in this bibliography I have relied in the main on the marvelously accurate and learned Catalogus Catalogorum of Aufrecht, although I have supplemented it by such catalogues as have appeared subsequently. For many titles of editions of plays and records of literature on the drama of India I am indebted to the bibliographies of Gildemeister and Zenker and to the Catalogue of Sanskrit books in the British Museum, although my richest source has naturally been the Orientalische Bibliographie. Antiquarian catalogues, especially those of Harrassowitz (Leipzig) and Luzac (London), have also been consulted with advantage.

My thanks are due to the librarians of the Royal Libraries of Copenhagen and Stockholm for information in regard to certain publications, while through the kindness of Professor Serge Oldenburg of St. Petersburg I had access to the large collections of the Russian Academy of Sciences and the Oriental Seminar of the University of St. Petersburg, and certain queries were answered for me by Professor Carl Cappeller of Jena. My friend and former fellow-student, Dr. Louis H. Gray, placed his library at my disposal and gave me several additions and suggestions, while both he and Mrs. Gray most generously aided in the correction of

the proofs. The main part of this toilsome revision, however, which my absence from America compelled me to forego, has been most kindly undertaken for me by Mr. George C. O. Haas, Fellow in Indo-Iranian in Columbia University, who has also added the new material from Hultzsch's Reports and the India Office Catalogue, and made many corrections and improvements. To my friend and teacher, Professor A. V. Williams Jackson, who, from the inception of the book to its completion, has grudged neither time nor pains to aid me, my deepest gratitude is due for his inspiration and assistance.

INTRODUCTORY SKETCH OF THE SANSKRIT DRAMA

It is now more than a hundred years since Sir William Jones gave the Western world its first knowledge of the dramatic literature of the Hindus by the publication, in 1789, of a translation of the Sakuntalā of Kalidāsa. From that time on, the labors of Sanskritists have gradually made accessible most of the chief works of the Sanskrit drama, and a large number of editions, translations, and commentaries are now available for the general student of literature.

The earliest manifestations of a dramatic idea in India are to be found in the hymns of the Rig Veda. Certain of these hymns are in the form of dialogues between various per-Origin. sonages of the Vedic pantheon, such as Yama and Yamī, Sarama and the Paņis, while the myth of King Purūravas and the nymph Urvaśī is the foundation for one of the plays of India's greatest dramatist. The lack of accurate data precludes our knowing much about the origin of the drama in India, but it is probable that it had its beginning in a combination of these hymns in dramatic form and in the religious dances, in which certain pantomimic features came to be conventionalized and stereotyped in later times until we get the classical Sanskrit This theory is borne out by the fact that in Sanskrit the words for play (nataka) and actor (nata) are from the root nat which is the Prakrit form of the Sanskrit mt 'to dance.' The native Hindu account of the origin of the drama was that it came down from heaven as a fully developed art invented by the divinesage Bharata. This theory, however satisfying to the Hindu mind, cannot be accepted by modern scholarship, and we are forced to presuppose a development from the religious to the dramatic, as outlined above, which is not essentially different from that found in Greece. The earlier stages, which were connected with religious festivals, and especially with the worship of Kṛṣṇa-Viṣṇu, were not unlike the early primitive Christian mystery-plays of the Middle Ages in Europe.

Whatever may have been its beginnings, it is certain that the drama flourished in India, and had a high development. The

earlier plays as we know them had considerable Character. freedom of choice of subject and treatment and they can be described, for the most part, as melodramas or tragicomedies. Primarily their elements are mixed: gravity and gaiety, despair and joy, terror and love-all are combined in the same play. Tragedy, in our sense of the term, there is none, for every drama must have a happy ending. As, according to the rules, death cannot be represented on the stage, it follows that one great source of inspiration for European tragedy is entirely eliminated. The usual subject for dramatic treatment is love, and according to the rank or social position of the hero and heroine the play is placed in one or another of the ten chief (rūpakā) or eighteen minor (uparūpaka) divisions of the drama recognized by the Hindu text-books. The trials and tribulations of the lovers, relieved by the rather clumsy attempts at wit of the vidusaka, or court jester, the plotting of the viti, or parasite, and the efforts of the rival wives to establish themselves in the favor of their lords and masters, with the incidents of every day life in the harem and court, constitute the plot of the play. The laments of the hero to his confidant, the jester, serve to introduce lyrical stanzas descriptive of the beauties of nature, the wiles and graces of woman, and the tender passion which fills the hero's heart for some fair maiden or celestial nymph. According to the Sanskrit treatises on dramatic art the subject of a nataka is to be taken from some famous legend, and its hero must be high-minded and

Although the drama is so carefully subdivided by the rhetorical text books, not all of these divisions are represented in the extant literature (see Appendix II). The precise character of many of the plays here recorded, however, could not be determined, as most manuscript cataloguers fail to distinguish the various varieties and use the word 'nataka' in the general sense of 'drama.' It is to be hoped that future cataloguers will examine the plays with more care and so record them that we may get a better idea of the comparative popularity o' the different forms of drama.

of noble birth, sprung from a race of gods or kings.¹ The expression of all feelings is allowed, but preponderance is to be given to love and heroism. There must be not less than five, nor more than ten, acts of mingled prose and verse. The Sanskrit tongue itself, as the learned or court language, is spoken by gods, Brahmans, heroes, kings, and men of good birth and position in general. Women and the lower classes of men speak various dialects of the Prakrit language, the old vernacular tongue of India. Among the Prākrits the most important is the Śauraseni, the form usually found in the dramas, the Mahārāṣṭrī being confined to the poetical stanzas.2 The rules for distinguishing the various individual kinds of characters are all carefully classified and divided; so far does this subdividing go that no less than three hundred and eighty-four types of heroine are given. In practice, of course, this is never carried out, but it must be acknowledged that the great defect of the Sanskrit drama is that in general it is too conventional, with the result that originality and life are sacrificed for a hackneved arrangement and a stereotyped manipulation of threadbare sentiments and action.

In the invention of plots the dramatists show little fertility of imagination; on the other hand cleverness is certainly clearly shown in the way in which the details of the Plots and Dramatis plot are worked out and the development of the intrigue is presented. In the majority of cases the plot is somewhat as follows: the hero, who is usually a king or a prince and already has one or more wives, at the opening of the play suddenly becomes enamored of the charms of some girl or nymph. Although she is equally in love with him she is too bashful and modest to let her passion be observed. Hope and fear alternately cheer and dismay both hero and heroine. She confides in some girl friend, he in the jester, who is always a brahman, but a person of slow intelligence whose uncouth attempts at wit seem often lacking in every element of humor. The jester,

moreover, is a glutton, greedy for money, and, as is to be expected, an inveterate gossip, always on the watch for some fresh bit One of the most curious features of the Sanskrit of news. drama, fostered as it was by the court society of India, which was almost always under the control of brahman priests, is that this figure of a degraded and besotted brahman should be allowed to appear as a typical stage-figure. In an article written some years ago 1 I advanced the theory that such a seeming inconsistency might be due to the fact that the drama had its origin in the religious dances and ceremonies of the common people, who were of course largely non-brahmanic, and was therefore an outgrowth of the many popular religions of India rather than a development of pure brahmanism. In this way the conventional figures, having become in the course of time crystallized into permanent types, were retained when the folk-drama became popular at court, and thus even brahman authors did not hesitate to perpetuate the type, though really derogatory to their class. Other stock characters in the plays are the parasite (vita), ministers, Buddhist monks and nuns, servants of the harem, dwarfs, mutes, and the female attendants of the king.

For the technical divisions of a drama and the development of the plot there are carefully elaborated rules, but of the actual scenic arrangement of a play, the manner of producing it, and the Technical Divisions assignment of the roles we know comparatively Plays seem to have been usually preand Arrangement little. of a Play. sented at the spring festival. A drama always opens with a nāndī, or benediction, usually addressed to Śiva, for the prosperity of the audience, by the sutradhara, or director. This director must have been very accomplished and versatile, for the rules say that among other things he must know music, technical treatises, dialects, the art of managing, works on poetry, rhetoric, acting, industrial arts, metre, astronomy, geography, history, and the genealogies of royal families. He was to have a good memory, and to be honest, intelligent, dignified, and

noble. According to the text-books he had two associates: the sthāpaka and the pāripārśvika.1 It is probable that in the actual practice of the theatre the duties assigned by the treatises to the sthāpaka were all performed by the sūtradhāra.2 At the end of the năndi there is a dialogue between the manager and some actor complimenting the audience on their critical ability and ending by introducing one of the characters of the play, after which the action goes on with regular divisions into acts and Scenes are marked by the exit of one person and the entrance of another, as on the Classical and the French stage, and the stage is never left empty until the end of the act. tween the acts a connecting scene called viskambhaka is often introduced, in which occurrences that have taken place since the preceding act are explained. The theory of the unity of time, place, and action, which played so important a part in the Greek drama, appears in rather a modified form in India. The time of the action is supposed to be the same as that occupied in the performance, or else to fall within twenty-four hours. But this rule is not always observed, and we find in the Uttararāmacarita of Bhayabhuti a lapse of twelve years between the first and second acts. Unity of place is not strictly observed, and journeys are often made, sometimes even through the air in celestial cars.

As to the stage-setting and decoration very little is yet known. Special buildings for the presentation of plays are described in the Nativaśāstra, but it is probable that dramas were usually given in a hall (sanguta-śālā 'concertroom') of the palace. Behind the stage, which occupied a quarter of the whole hall, was a curtain divided in the middle, and behind that again was the greenroom (nepathya) whence the actors came on the stage. The greenroom had an entrance from the outside 'separate from the entrance for the audience.' Scenery and

decoration were apparently very simple and much was left to the imagination. Elaborate directions for gestures, pantomime, and clothing are given. Thrones, seats, chariots, weapons, and armor were employed, and some sort of mechanical contrivances were perhaps not unknown. We must infer, however, from the frequent use of the word nāṭayitvā, 'having gesticulated,' nāṭayati, 'mimics, acts as if doing,' as a stage direction, that pantomime and gesticulation were largely resorted to for filling out the deficiencies of the staging.

The age of the Sanskrit drama may roughly be given as extending from 400 to 1100 a.d.. This period does not, of course, include the earliest efforts at dramatic composition, nor take in a large number of late and inferior plays. Very little is known of the earliest dramatists before Kalidasa, and none of their compositions excepting scattered verses are extant. For example, the poets Bhāsa, Rāmila, Somila (or Saumillaka), and the Kaviputras were well known and popular playwrights among the Hindus of Kalidāsa's time, but our knowledge of them is practically confined to their names ¹

Most students of the Sanskrit drama are of the opinion that the Mycchakatika, or 'Clay Cart,' of Śudraka is the oldest extant Sanskrit play. The arguments in favor of this Śūdraka's view are based upon the state of civilization Mrcchakatikă. shown in the play, the general style of the drama and the richness and diversity of the Prakrit dialects employed in its composition. Some scholars, however, whose researches in the Hindu drama entitle them to speak with great authority upon this subject, believe that the play is not earlier than the sixth century of our era, or approximately of the same period as Kalidasa's dramas. I must confess, nevertheless, that I find myself among the number of those that are inclined to consider it of much earlier date. The question of the authorship of the Mrechakatika is also still under discussion. In the prologue the play is stated

to be the production of King Śūdraka, but not all kings are authors, and it is thought that in this case, as probably in others, the real author, like a wise courtier, may have attributed his work to his royal master in order to gain favor. Many of the rulers of ancient India delighted in playing the part of patrons of art and literature; Śūdraka may well have been one of these. Professor Pischel, after a careful study of the material, thinks that the real author was a poet named Dandin. However that may be, there is no question that the Mrcchakatikā is in many respects the most human of all the Sanskrit plays. There is something strikingly Shaksperian in the skilful drawing of the characters, the energy and life of the large number of personages in the play, and in the directness and clearness of the plot itself. It is a ten-act prakarana, or comedy of middle-class life, and the scene is laid in the city of Ujjain. The subject of the plot is the love and marriage of Carudatta, a brahman merchant reduced to poverty by his generosity, and Vasantasenā, a rich In the third act there is a long and humorous accourtesan. count of a burglary in which stealing is treated as an art or science provided with rules and conventional procedure. The chief value of the Mrcchakațikă, aside from its interest as a drama, lies in the graphic picture it presents of a very interesting phase of everyday life in ancient India. The elaborate description of the heroine's palace in the fourth act gives us a glimpse of what was considered luxury in those days. The name 'Clay Cart' is taken from an episode in the sixth act, which leads to the finding of the heroine's jewels in the terra cotta cart of the hero's little son and to their use as circumstantial evidence in a trial. This complicates the plot until all is resolved in the denouement.

The greatest name in Sanskrit literature is that of Kālidāsa who lived at the court of Ujjain, probably about the first half of the sixth century of our era, although his date is not settled and the question is still a mooted one. He is the author of three plays, Śakuntalā, Vikramorvaši, and Mālavikāgnimitra. The first two of these compositions reach the highest level attained by the Hindu dramatists and

win for their author a place among the greater poets of the world. Their richness of fancy and appreciation of nature, added to the beauty of poetic technique and choice of language, have never been equaled in India, and bear favorable comparison with the dramas of any nation.

The play of Śakuntalā has been known in Europe since its translation by Sir William Jones in 1789, by which work that great Orientalist really introduced Sanskrit poetry to the West and started the study of Hindu literature. The play is a nāṭaka, or heroic comedy, of seven acts, and its plot is drawn from the first book of the Mahābhārata. The subject of the drama is the love of King Dusyanta for Śakuntala, their separation by accident, and their ultimate reunion in the presence of their son after the lapse of some years. The importance of this play lies not only in the fact that it is the most perfect Sanskrit drama extant, but also in the fact that its great literary merit, as was evident from Sir William's translation, aroused a widespread interest in the literature of India throughout Europe. It was enthusiastically received by the followers of the Romantic School and exercised a genuine influence upon them. Jones's English version was soon rendered into other languages, and independent translations from the original Sanskrit have since been made into almost all the tongues of Europe, so that I am able to record versions and adaptations of the play in English, German, French, Italian, Spanish, Dutch, Danish, Swedish, Icelandic, Russian, Polish, Hungarian, and Bohemian.

Kálidāsa's other important play is the Vikramorvaši. It was first translated into English into 1827 by Horace Hayman Wilson, a scholar who devoted a great part of his life to the study of the Sanskrit drama, and whose 'Select Specimens of the Theatre of the Hindus' is a standard work even to-day. Later investigations have rendered some of his views antiquated, but his book remained for years the only work upon the Sanskrit drama as a whole, until the appearance, in 1890, of Sylvain Lévi's admirable and scholarly treatise, Le Théâtre indien, a work indispensable to students. The plot of the Vikramorvaši is briefly as

follows: King Purūravas rescues the nymph Urvaśī, who has been carried away by the demons, and his heroism wins her love. The lovers become separated by accident, but after various vicissitudes are reunited in the presence of their son when the latter is about twelve years old.

The third play of Kālidāsa, entitled *Mālavikāgnimitra*, or 'King Agnimitra's Love for Mālavikā,' is a conventional drama of harem intrigue at the court, and is decidedly inferior to the author's other two plays. So marked is this inferiority that some scholars have even gone so far as to question its right to bear Kālidāsa's name.

We now come to an interesting group of three plays ascribed to Harṣadeva, king of northern India, which have been the object

As in the case of the of much discussion. Mrcchakațikā, it is probable that they were the Harsadeva. work of some poet who, to curry favor, ascribed their authorship to that famous patron of art and literature, Harşadeva. three plays are Ratnāvalī, Priyadarsikā, and Nāgānanda. first two are dramas of harem intrigue and court life, composed, it is true, upon conventional lines, but showing some ingenuity in the manipulation of plot and the invention of incident. Ratnāvali, or 'Jewel Necklace,' the subject is the story of the loves of Vatsa, or Udayana, king of Kauśambī, and Sāgarikā, an attendant of his wife, queen Vasavadatta, who ultimately is discovered, by a necklace she wears, to be Ratnavali, princess of Ceylon, who had been shipwrecked and had found her way to Vatsa's The characters are clearly defined and not mere puppets, as in the case of some dramas. The poetical part is rather conventional, but there are several pretty lines descriptive of natural scenery, moonrise, and the like. The drama Privadaršikā, named after its heroine, is much the same sort of play, but not so good. The lack of a good critical edition and English translation of this play has made it difficult for students, but this lack is soon to be overcome, and a translation by G. K. S. Nariman, with an introductory memoir from the pen of Professor Jackson, will soon be ready. The third play, Nagananda, 'Joy of the Serpents,' is in some respects quite unique. It is a highly-colored melodrama with a pronounced Buddhistic tendency, as Buddha is invoked in the nāndī, and the hero himself is a Buddhist. In this respect the Nāgā-nanda stands alone among the extant Sanskrit plays, although we know that there were other Buddhist dramas which have not been preserved. Such was the Lokānanda of Candragomin, of which there is a Tibetan translation. The Nāgarāja and Sānti-carita are, perhaps, imitations of the Nāgānanda or even identical with it. In the Avadānaśataka (75) there is a record of the representation of a Buddhist drama, according to Oldenburg. Several Jain plays are also known.

The dramatist Bhavabhūti, who lived during the first half of the eighth century, was a native of Vidarbha, the Province of

Berar, in south-central India, and he wrote under Bhavabhūti. the protection of king Yasovarman of Kanauj. He is the author of three plays, the Malatimadhava, Mahaviracarita, and Uttararāmacarita, which are distinguished by great poetic beauty and feeling, exquisite verse, polished style, but little humor or wit (the jester being absent from all), and only moderate dramatic power. They are, perhaps, dramatic poems rather than dramas. Bhavabhūti's home in the mountain regions of south-central India doubtless gave him a love of the grand and titanic aspects of nature instead of the mild and gentle phases described by the other Hindu authors. His characters have much grace and tenderness and also possess energy and life. His most popular play is the ten act frakarana, or melodrama, Mālati-mādhava, the scene of which is laid in Ujjain. is the story of the love of Malati, daughter of a cabinet minister, and Mādhava, a young student. This charming play is often called the Romeo and Juliet of India, but it has a happy ending, as all Sanskrit plays must have. The whole drama is a succession of contrasted situations, first of love and then of the weird incantations of the terrible priestess of Durga, scenes which are used to heighten the dramatic effect as well as to contribute to

the plot. In the fifth act the scene is laid in the field where the bodies of the dead are burned. The two other plays of Bhavabhūti form a history of the deeds of the hero Rama, and are based on the epic poem $R\bar{a}m\bar{a}yana$. I shall omit a detailed description of these.

The chief interest of the Karpūramañjari, which has been admirably edited in the Harvard Oriental Series by Dr. Sten Konow with a translation by Professor Lanman, consists in the fact that it renders accessible the only extant example of the kind of drama called sattaka. The sattaka is nearly the same as the natika, or minor heroic comedy, except that it is composed entirely in Prakrit. Of the Viddhaśālabhañjikā I had hoped to publish a translation, upon which I was engaged, but the pressure of other duties has prevented me, and the work has now been done by my friend and fellow-student, Dr. Louis H. Gray.

Mahābhārata in which the Pāṇḍu wife Draupadī is dragged by the hair into the assembly and outrageously exposed before the Kurus. The play is written in exact accordance with the rules of text-books and largely for that reason it has always been a favorite in India.

An admirable but less known drama is the Candakauśika by Kṣemiśvara, whose date is uncertain. This play presents a vivid picture of the workings of a curse uttered by the angry priest Kauśika against an upright king who had innocently offended him. The king forfeits his realm and loses his wife and child, the latter by death and his consort by her being sold into slavery. Though tried to the utmost, the Job-like patience of the righteous monarch never fails, and in the end he has his wife, his son, and his kingdom restored to him by divine intervention, so that all ends in happiness.

In the eleventh century was composed a dramatic monstrosity, the huge Mahānāṭaka, ascribed to Hanuman, the monkey-king.

The Mahanataka. It has fourteen acts in one recension and ten in the other, and thus violates the rule which requires that no drama shall exceed ten acts in length. It is quite without interest to students of literature except as a curiosity.

The tenth and eleventh centuries in India witnessed a renewed interest in the dramatic art, and to that time belong many other

Rrsnamisra. plays which must be omitted here on account of lack of space. One, however, which must be mentioned is the *Prabodhacandrodaya*, or 'Rise of the Moon of Intellect,' an allegorical drama by the poet Kṛṣṇamiṣra. The characters in this play, as in the old English Moralities, are symbolical figures and personified abstract ideas, and it is indeed remarkable that with such subject matter the author should have succeeded in producing a drama of so much real merit. The plot is as follows: The wicked King Error is the ruler of the city of Benares. He is surrounded by his followers, the Follies and Vices, while the good King Reason and his followers, Religion

and the Virtues, have been sent into exile. In accordance with a prophecy, Reason will at some time marry Revelation, and the fruit of that union will be True Knowledge, who will overthrow the power of King Error. The plot recounts the vicissitudes of the struggle and the final triumph of good.

The Sankalpasūryodaya of Venkaṭanātha and the Caitanya-candrodaya of Kavikarṇapūra who wrote about the middle of the sixteenth century are obvious imitations of the Prabodhacandrodaya and have as dramatis personae almost the same characters.

Of the later history of the Sanskrit drama it is not necessary to write at length. It has had a continuous existence from the Later Plays.

| Period of the greatest works down to the present time. The later plays, although written in exact accordance with the rules of Hindu dramaturgy, are for the most part lacking in interest and action.

¹ Wilson in 1827 gave the names of 60 Sanskrit plays, Lévi in 1890 was able to increase the number of titles known to 372, and the present bibliography lists over 500 separate productions.

APPENDIX II

Classification of the Dramas

A complete classification of the extant dramas according to the divisions (rupakas) and subdivisions (uparūpakas) recognized in Indian dramaturgical treatises cannot be made at the present time, because, as pointed out above (p. 3, n. 1), the meagre details of the manuscript catalogues and the ambiguous use of the term naṭaka leave the precise character of many plays still in doubt. Those dramas whose character is definitely known, however, are here grouped under their respective classes, and plays known only by name have also been included, but distinguished from those actually in existence by a prefixed asterisk (*). The authorship of the plays has not been indicated, even in cases where there is more than one work of the same name, as this and other details can easily be ascertained from the corresponding entries in the main body of the work.

Owing to the difficulties of classification pointed out above, very few dramas could with certainty be defined as natakas in the narrower sense. In the list there have been included certain others edistinguished by interrogation-points) that seem, for one reason or another, to belong to this group, but cannot be definitely assigned to it at the present time. In spite of these additions, the proportion of plays of this class is much larger than would seem to be indicated by the meagre list here given, and an examination of the large number of dramas vaguely designated as natakas would unquestionably disclose many additional productions of this variety.

COLUMBIA UNIVERSITY INDO-IRANIAN SERIES

Edited by A. V. WILLIAMS JACKSON Professor of Indo-Iranian Languages in Columbia University

Volume 1. A Sanskrit Grammar for Beginners. With Graded Exercises, Notes, and Vocabulary. By A. V. WILLIAMS Jackson. In preparation.

The aim of this work is a practical one; it is designed to furnish a book for the study of the classical Sanskrit in American and English colleges and universities.

Volume 2. Indo-Iranian Phonology, with Special Reference to the Middle and New Indo-Iranian Languages. By Louis H. Gray, Ph.D., sometime Fellow in Indo-Iranian Languages in Columbia University. New York, 1902.

Cloth, 8vo, pp. xvii + 264, \$3.00.

A brief statement of the phonetic developments undergone by the principal Indo-Iranian languages from the Sanskrit, Avestan, and Old Persian through the Pali, the Frakrits, and Pahlavi down to the Hindi, Singhalese, New Persian, Afghan, and other Indo Iranian dialects. Special pains have been taken to make the work as convenient as possible for reference.

Volume 3. A Bibliography of the Sanskrit Drama, with an Introductory Sketch of the Dramatic Literature of India. MONTGOMERY SCHUYLER, JR., A.M., sometime Fellow in Indo-Iranian Languages in Columbia University. New York, 1906. Cloth, 8vo, pp. xi + 105, \$1.50.

The design of this bibliography is to give as complete a list as possible of all printed and manuscript Sanskrit plays and of articles and works relating to the Hindu drama. The introduction furnishes a convenient epitome of the whole subject.

Volume 4. An Index Verborum of the Fragments of the Avesta. By Montgomery Schuyler, Jr., A.M. New York, 1901. Cloth, 8vo, pp. xiv + 106, \$1.50.

This index collects in convenient form all examples of each word found in the hitherto discovered tragments not included in Geldner's edition of the Avesta.

[SEE OTHER SIDE]

In addition to the Sanskrit Grammar for Beginners, the following volumes are also in preparation:

Priyadarśikā, a Hindu Drama ascribed to King Harsha. Translated from the Sanskrit and Prakrit by G. K. NARIMAN and A. V. WILLIAMS JACKSON, with notes and an introduction by the latter.

This romantic drama on the adventures of a lost princess was supposedly written by Harsha, king of Northern India in the seventh century, and is now to be published for the first time in English translation. Besides giving a detailed account of the life and times of the author, the introduction will deal also with the literary, linguistic, and archaeological aspects of the play.

Vāsavadattā, a Sanskrit Novel by Subandhu. Translated for the first time, with introduction, notes, and appendixes, by Louis H. Gray, Ph.D.

This literary composition is one of the best examples of the artificial and ornate style in Sanskrit prose. The introduction will contain an account of the author and an elaborate discussion of the Oriental novel in general; an appendix will furnish a list of mythological, geographical, and other allusions in the text.

Daśarūpa, a treatise on Hindu Dramaturgy by Dhanamjaya. Translated for the first time, with an introduction, notes, and appendixes, by George C. O. Haas, A.M., sometime Fellow in Indo-Iranian Languages in Columbia University.

This work, composed at the court of King Bhoja in the latter half of the tenth century, is one of the three most important treatises on the canons of dramatic composition in early India, a full discussion of which will be given in the introduction. The appendixes will include, among other things, a table of parallel passages in the other treatises on dramatics and a list of technical terms.

The following volume, not in the Indo-Iranian series, is also published by the Columbia University Press:

Zoroaster, the Prophet of Ancient Iran. By A. V. WILLIAMS Jackson. New York, 1899.

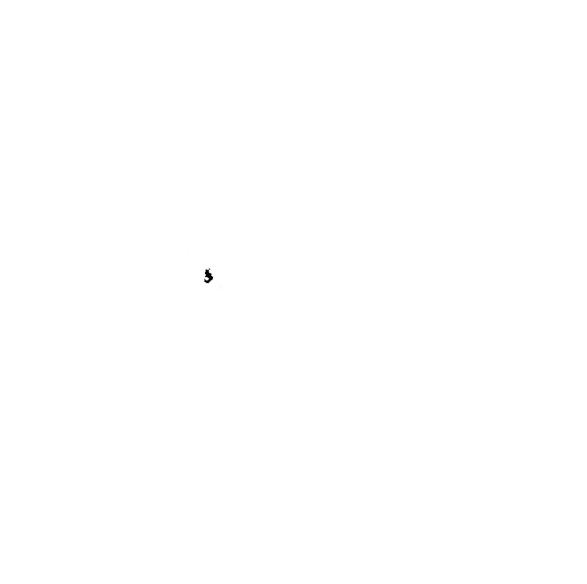

Cloth, 8vo, pp. xxiii + 314, with a map and 3 illustrations, \$3.00.

This work aims to collect in one volume all that is known about the great Iranian prophet, the Master whose teaching the Parsis today still faithfully follow. The story of the life and ministry of Zoroaster is told in twelve chapters, and these are followed by appendixes on explanations of Zoroaster's name, the date of the Prophet, Zoroastrian chronology, Zoroaster's native place and the scene of his ministry, and classical and other passages mentioning his name.
